EOS Box

Box: 6” x 6” cardstock, scored at 2” on all 4 sides
Cut on the score lines to remove each corner square.

Lid: 4” x 4” cardstock, scored at 1” on all 4 sides
Cut on 2 score lines on opposite sides to create tabs. Put Tear & Tape Adhesive on the outside of the tabs; remove backing and tuck tabs inside to make lid.

Insert/holder: 1 7/8” x 5 ½” cardstock, scored at:
1 7/8”
2 3/8”
4 ¼”
4 ¾”

Punch 1 3/8” circle in large middle panel and fold and adhere with Tear & Tape Adhesive to make the insert and attach to the base so that the circle is on top.

Inside panels of DSP are 1 7/8”. Ruth rounded hers; I chose not to.

Here’s my version:

I used Merry Little Christmas DSP, Pick a Pattern Washi Tape and 7/8” Striped Ribbon.

I held the ribbon closed around the box and stapled the overlapped ends together—and so it could just slide off/on.
